

UrbanCart Sales Analytics & Business Insights By SQL

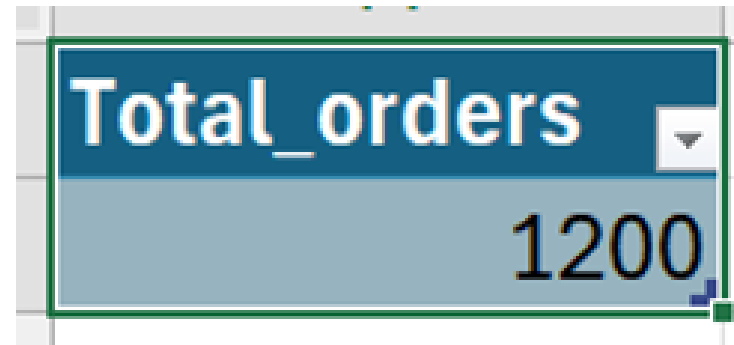

Overview

UrbanCart is a growing online retail shop operating across multiple cities. It sells a wide range of consumer products and processes thousands of customer orders every month.

ER Diagram

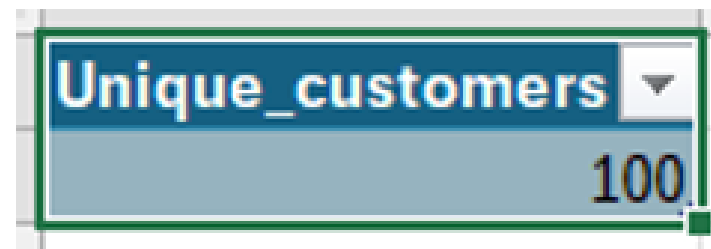

1. How many total orders has UrbanCart received so far?

- ❑ UrbanCart's total order count reflects steady customer engagement and serves as a key benchmark for tracking business growth over time.

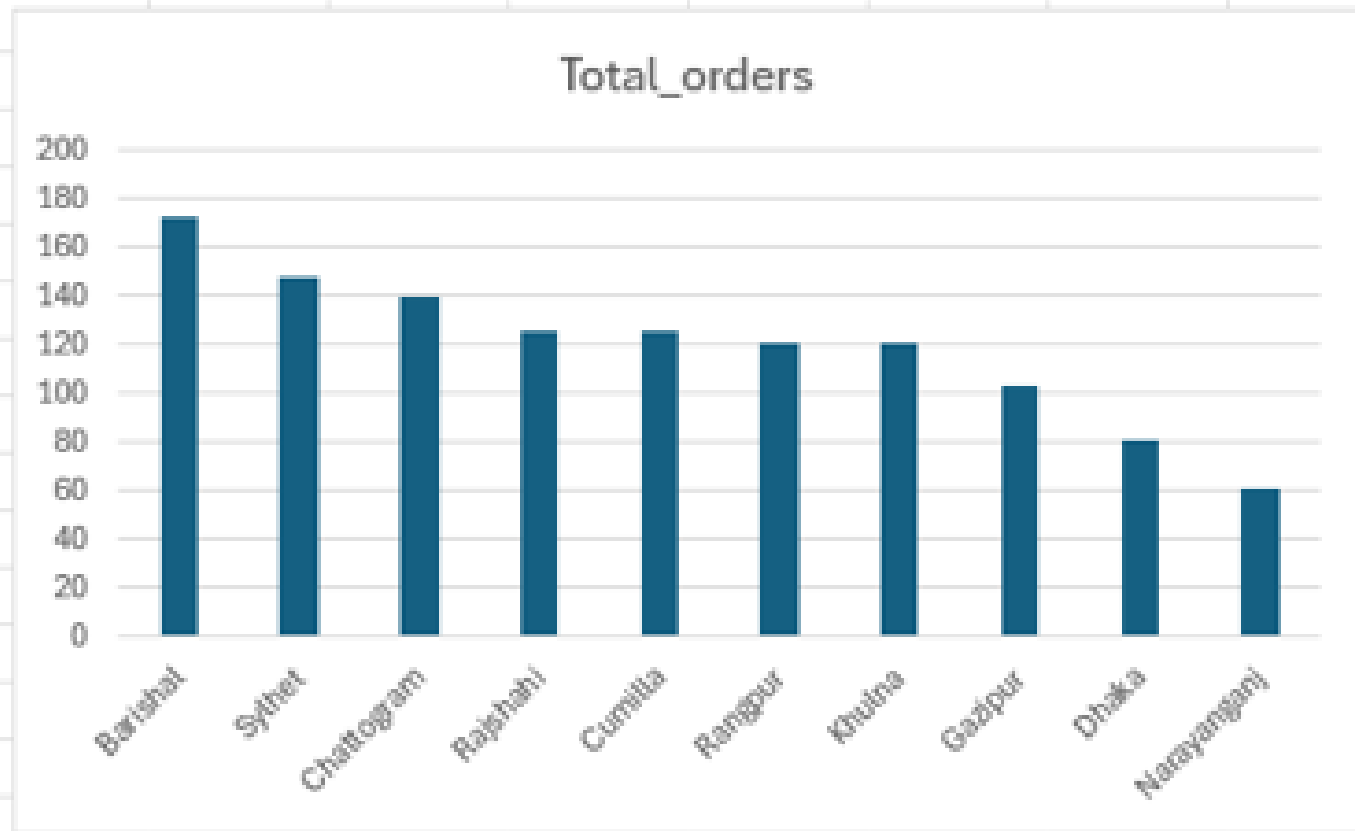

2. How many unique customers have placed at least one order?

- ❑ The unique customer count shows how many real customers UrbanCart has engaged so far and helps distinguish between new user growth and repeat orders.

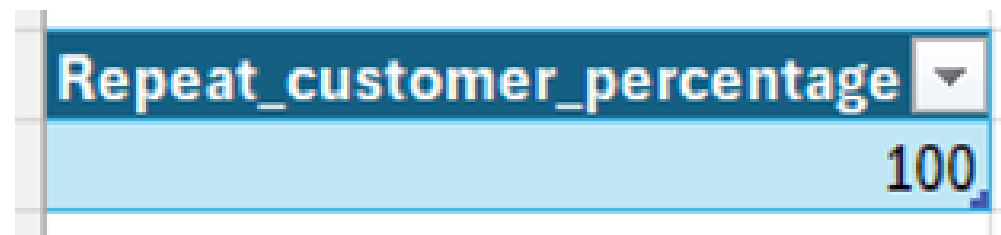

3. Which cities generate the highest number of orders?

city	total_orders
Barishal	173
Sylhet	148
Chattogram	140
Rajshahi	126
Cumilla	126
Rangpur	121
Khulna	121
Gazipur	103
Dhaka	81
Narayanganj	61

- ❑ A small number of cities contribute most of UrbanCart's orders, making them priority regions for marketing and operational focus.

4. What percentage of customers have placed more than one order?

Repeat_customer_percentage
100

- ❑ The proportion of customers placing more than one order highlights UrbanCart's customer retention and loyalty level. A higher percentage suggests strong repeat purchasing behavior, while a lower percentage indicates that most customers are one-time buyers and retention strategies may need improvement.

5. What is the monthly trend of total orders over time?

month	total_orders
2025-09-01 00:00:00+06	243
2025-10-01 00:00:00+06	413
2025-11-01 00:00:00+06	371
2025-12-01 00:00:00+06	173

- ❑ Monthly orders reveal peak demand periods, while products with sales exceeding stock indicate a risk of stock-outs, highlighting the need to restock high-demand items on time.

6. What is the total revenue generated by UrbanCart?

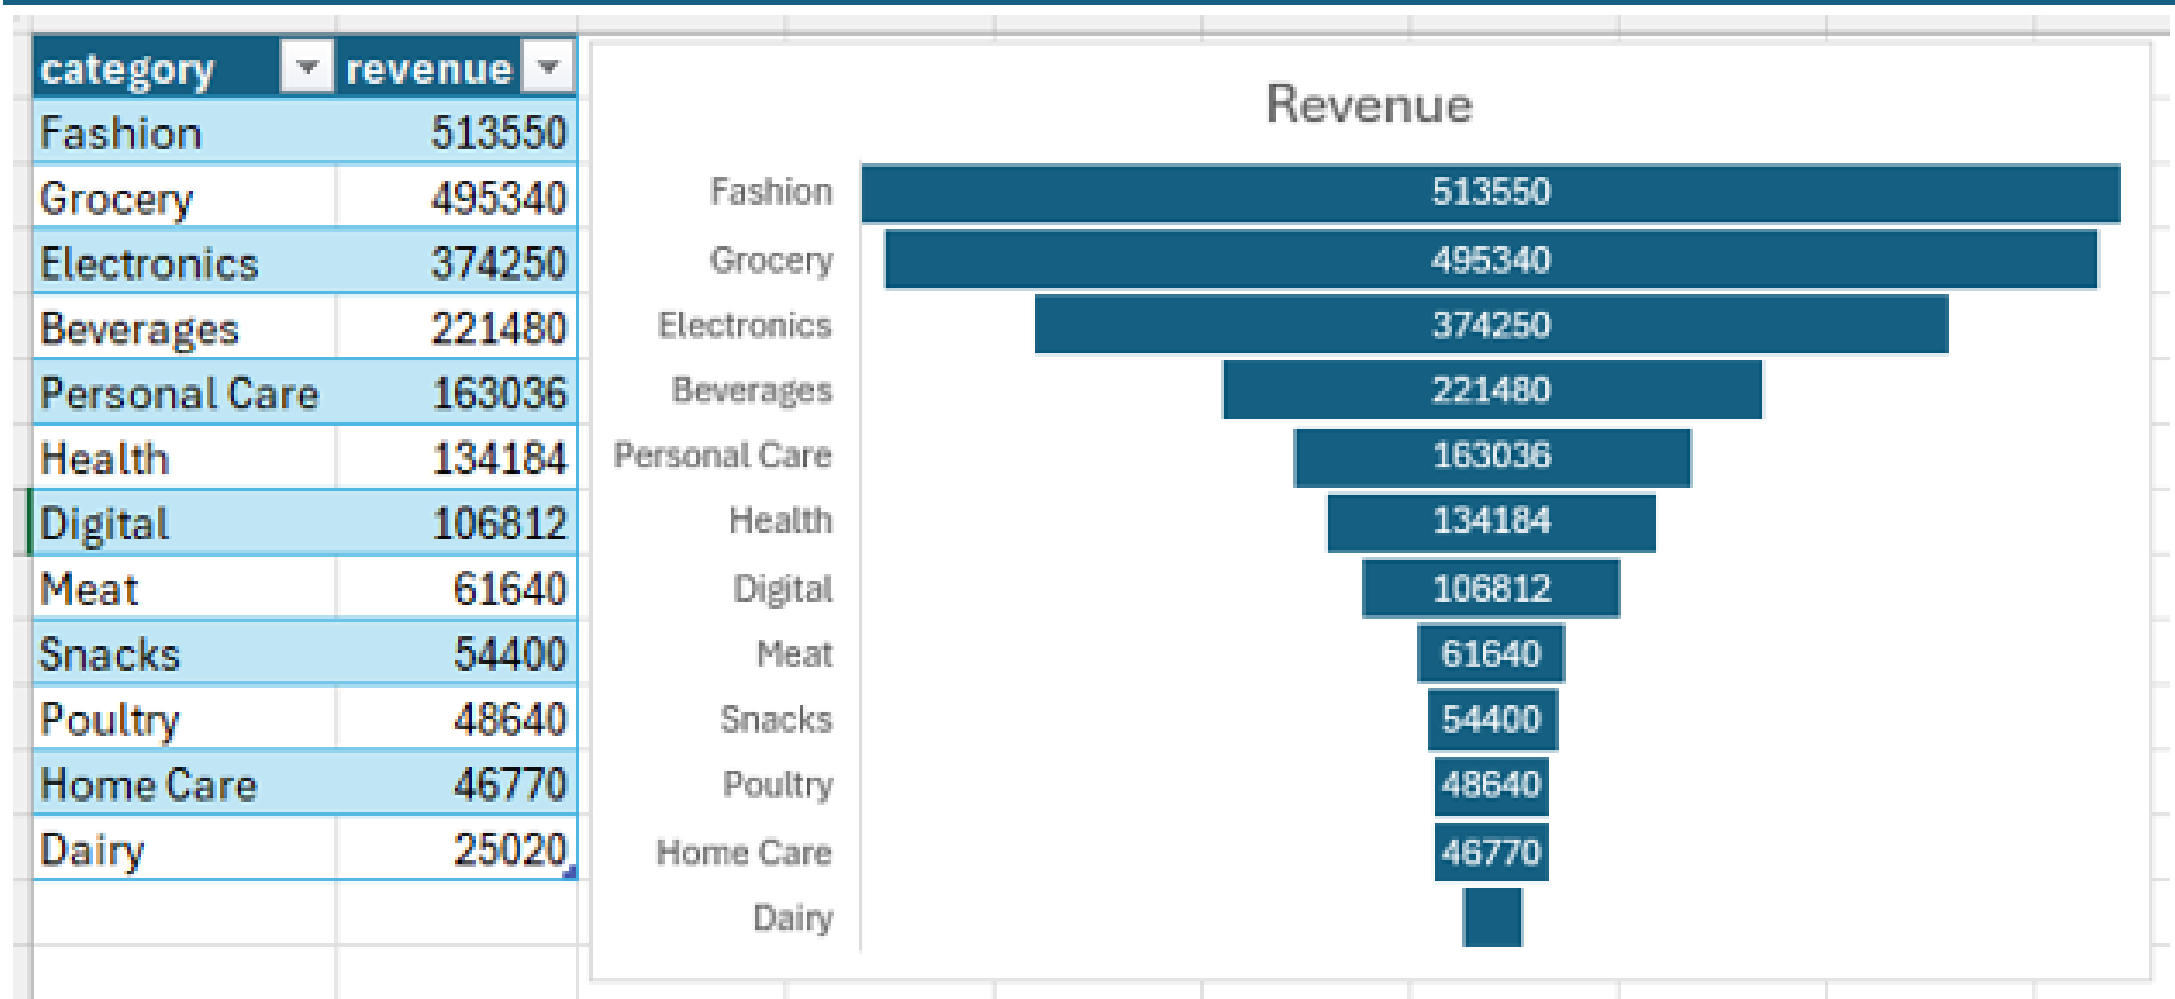

A screenshot of a data table with a blue header and a light blue body. The header row contains the text 'Total_revenue' followed by a small downward-pointing triangle icon. The body row contains the numerical value '2245122'.

Total_revenue ▼
2245122

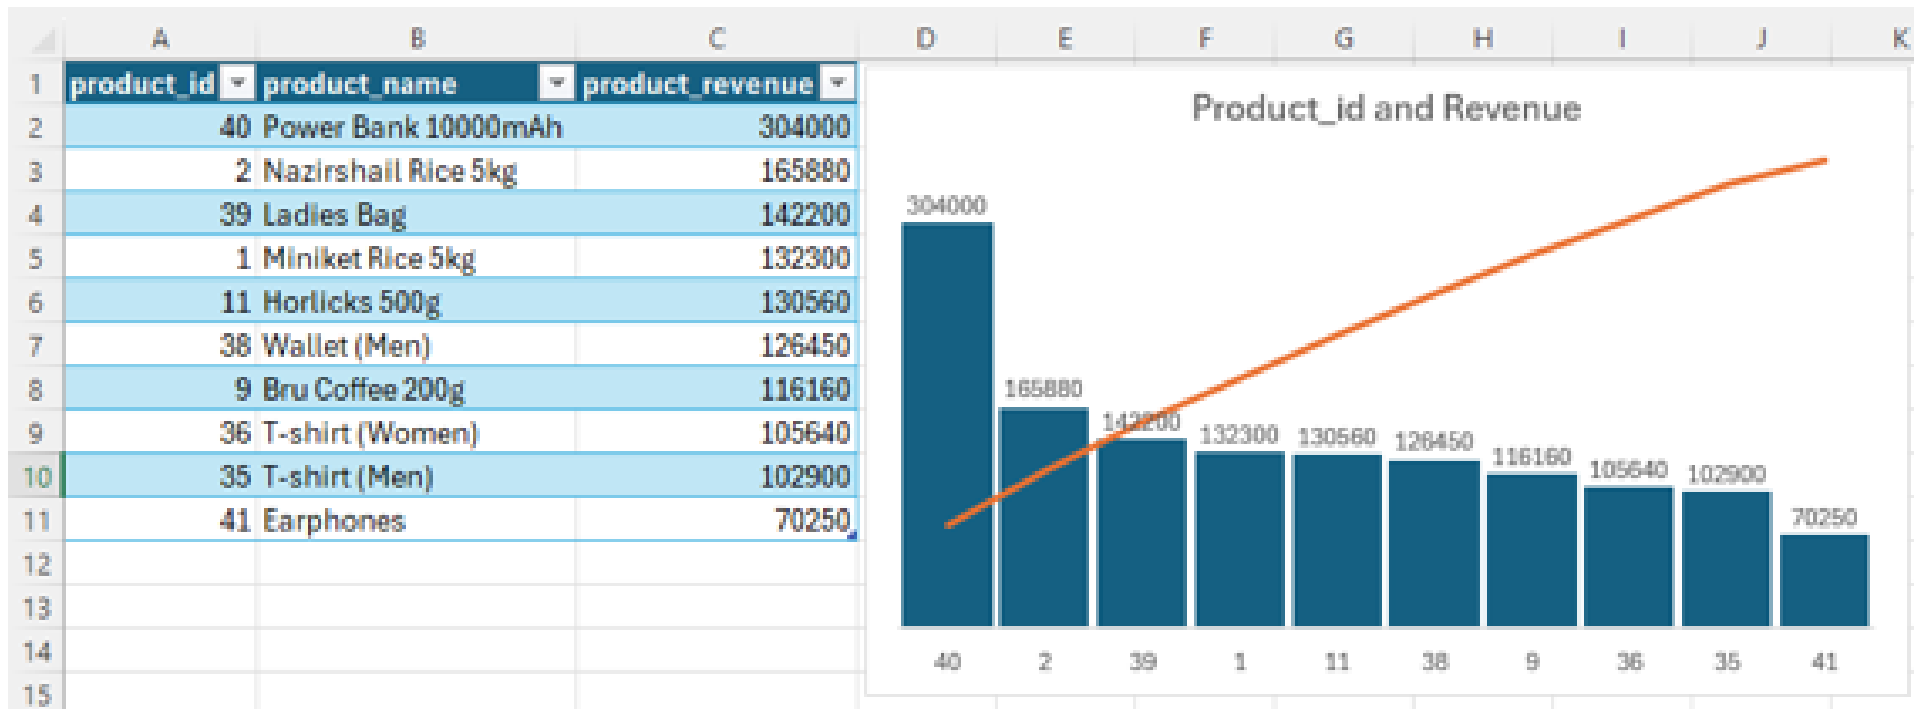

- ❑ The total revenue shows how much UrbanCart has earned from all sold products. High-revenue products can be prioritized for promotions and inventory planning, while low-selling items may need marketing attention or discounts.

7. Which product categories contribute the most to total revenue?

- ❑ Certain product categories generate the highest revenue, indicating they are key drivers of UrbanCart's sales. Focusing marketing, promotions, and inventory on these categories can maximize overall revenue.

8. Which individual products generate the highest revenue?

- ❑ The top 10 products generate the majority of revenue, highlighting them as key contributors to sales. Prioritizing these items for promotions, inventory management, and marketing can maximize overall profitability.

9. What is the average order value (AOV) and Average Basket Size?

Column1	Column2
average_order_value	average_basket_size
1870.935000000000000000	9.956666666666666667

- ❑ The Average Order Value (AOV) shows how much customers typically spend per order, while the Average Basket Size indicates how many items they buy. Together, these metrics help UrbanCart understand purchasing behavior and optimize pricing, promotions, and cross-selling strategies.

10. Which products are at risk of stock-out due to high sales volume and low inventory?

product_id	product_name	stock	total_sold
9	Bru Coffee 200g	200	352
40	Power Bank 10000mAh	90	320
2	Nazirshail Rice 5kg	300	319
18	Clear Men Shampoo 180ml	250	308
7	Deshi Egg (12 pcs)	250	304
37	Cap	200	303
34	Shoes Polish	200	286
38	Wallet (Men)	150	281
36	T-shirt (Women)	250	278
11	Horlicks 500g	180	272
6	Broiler Chicken (whole)	200	268
39	Ladies Bag	150	237

- ❑ Products where total sales meet or exceed current stock are at high risk of stock-outs. Prioritizing these items for restocking can prevent lost sales and maintain customer satisfaction.

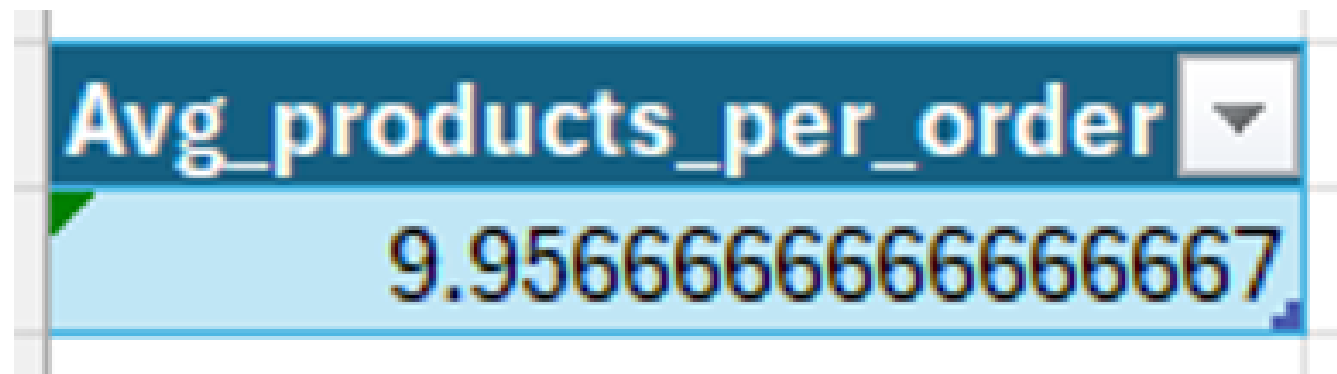

11. Which customers contribute the highest total revenue?

product_id	product_name	category	unit_price	stock
1	Miniket Rice 5kg	Grocery	450	500
2	Nazirshail Rice 5k	Grocery	520	300
3	Rupchanda Soyab	Grocery	175	800
4	Fresh Sugar 1kg	Grocery	95	500
5	ACI Pure Salt 1kg	Grocery	38	600
6	Broiler Chicken (w. Meat		230	200
7	Deshi Egg (12 pcs)	Poultry	160	250
8	Farm Fresh Milk 1	Dairy	90	400
9	Bru Coffee 200g	Beverages	330	200
10	Taaza Black Tea 4	Beverages	190	500
11	Horlicks 500g	Health	480	180
12	Oral Saline (ORS)	Health	12	2000
13	Vim Dishwashing	Home Care	35	900
14	Wheel Washing P	Home Care	95	500
15	Lifebuoy Soap 100	Personal Care	38	1200
16	Lux Soap 100g	Personal Care	40	1100
17	Sunsilk Shampoo	Personal Care	160	300
18	Clear Men Shamp	Personal Care	190	250
19	Bashundhara Tiss	Home Care	35	700
20	Banglalink Intern	Digital	99	999

21	Robi Internet Pack	Digital	129	999
22	GP Internet Pack	Digital	149	999
23	Onion 1kg	Grocery	80	600
24	Potato 1kg	Grocery	35	900
25	Green Chili 100g	Grocery	20	300
26	Lentil (Dal) 1kg	Grocery	120	500
27	Flour (Atta) 2kg	Grocery	110	400
28	Biscuits (Mixed)	Snacks	20	1200
29	Chanachur 200g	Snacks	40	900
30	Peanut 500g	Snacks	120	350
31	Water Bottle 1L	Beverages	20	2000
32	Pepsi 1L	Beverages	75	500
33	Sprite 1L	Beverages	70	500
34	Shoes Polish	Personal Care	130	200
35	T-shirt (Men)	Fashion	350	300
36	T-shirt (Women)	Fashion	380	250
37	Cap	Fashion	120	200
38	Wallet (Men)	Fashion	450	150
39	Ladies Bag	Fashion	600	150
40	Power Bank 10000	Electronics	950	90
41	Earphones	Electronics	250	300

- ❑ A small group of customers generates most of the revenue. These high-value customers buy more often and spend more per order than average customers. This shows revenue is concentrated among top customers, so focusing on their retention through loyalty programs and personalized offers can significantly improve overall business performance and revenue stability.

12. What is the average number of products purchased per order?

A screenshot of a data table with a blue header and a light blue body. The header row contains the text 'Avg_products_per_order' followed by a dropdown arrow icon. The body row contains the numerical value '9.956666666666666666666667'.

Avg_products_per_order
9.956666666666666666666667

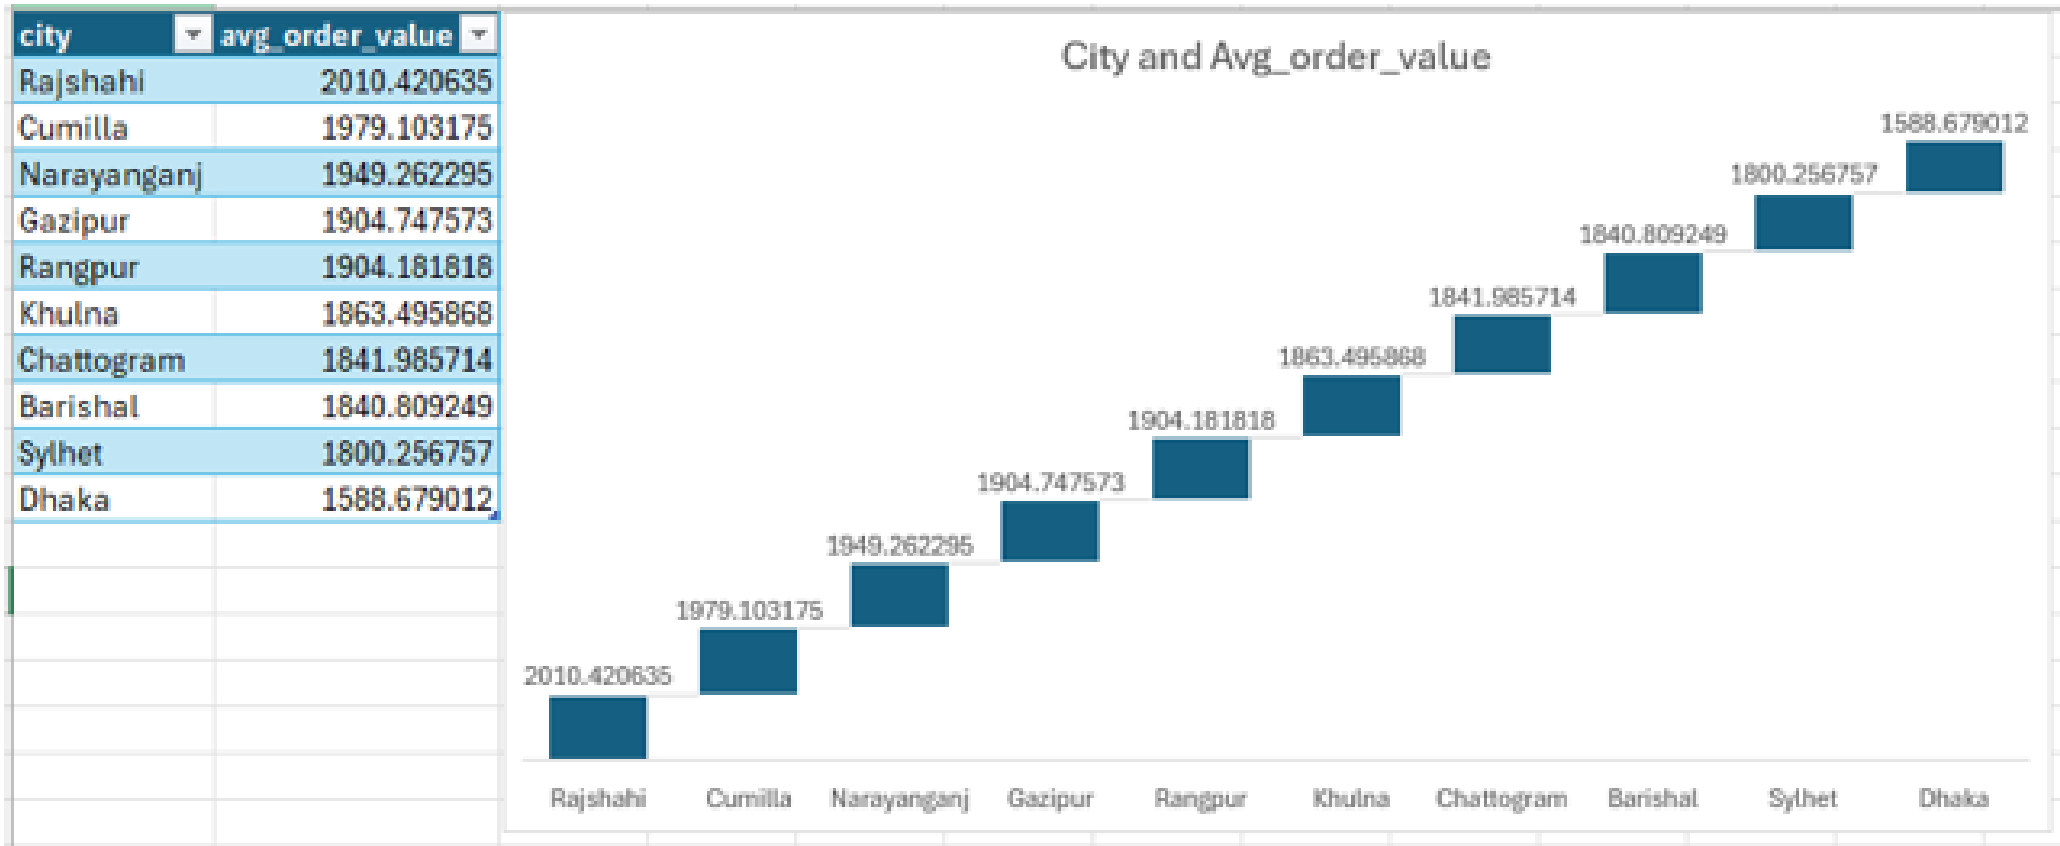

- ❑ Customers usually buy only a few products per order, indicating small basket sizes and potential to increase revenue through cross-selling and bundle offers.

13. Do male and female customers show different purchasing patterns by category?

gender	category	total_quantity	total_revenue
Male	Beverages	814	120765
Female	Beverages	738	100715
Male	Dairy	177	15930
Female	Dairy	101	9090
Male	Digital	525	66535
Female	Digital	323	40277
Male	Electronics	345	218550
Female	Electronics	256	155700
Male	Fashion	819	297130
Female	Fashion	574	216420
Male	Grocery	1707	304106
Female	Grocery	1228	191234
Male	Health	290	67128
Female	Health	284	67056
Male	Home Care	476	26860
Female	Home Care	370	19910
Male	Meat	155	35650
Female	Meat	113	25990
Male	Personal Care	852	94786
Female	Personal Care	622	68250
Female	Poultry	156	24960
Male	Poultry	148	23680
Male	Snacks	468	29660
Female	Snacks	407	24740

- Male and female customers show different preferences across product categories, indicating distinct purchasing patterns that can be leveraged for gender-specific marketing and category-focused promotions.

14. Which cities have the highest average order value?

❑ Some cities have significantly higher average order values, indicating stronger purchasing power or preference for higher-value products, which can guide targeted marketing and pricing strategies.

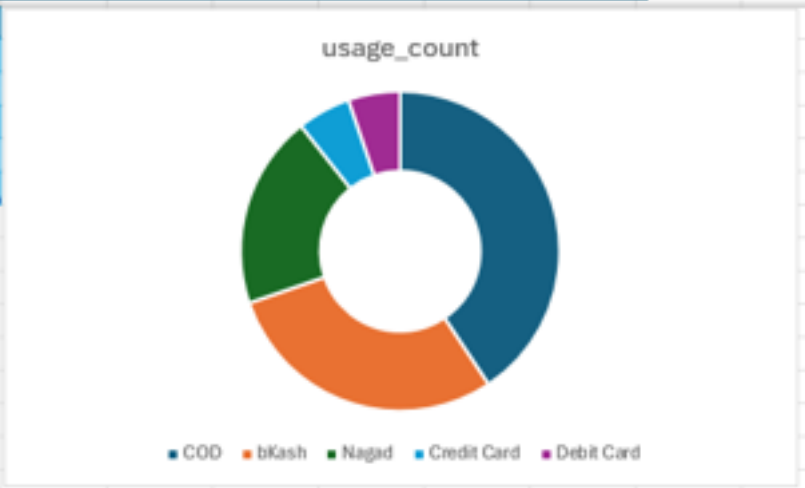

15. How does customer purchasing behavior change over time since account creation?

months_since_signup	total_orders	total_revenue	avg_order_value
0	1868	853134	456.7098501070663812
1	1420	651324	458.6788732394366197
2	1116	553476	495.9462365591397849
NULL	396	187188	472.69696969696970

- Customer purchasing activity tends to increase in the first few months after account creation and may stabilize or decline over time, highlighting opportunities for early engagement and retention strategies.

16. Which payment methods are used most frequently?

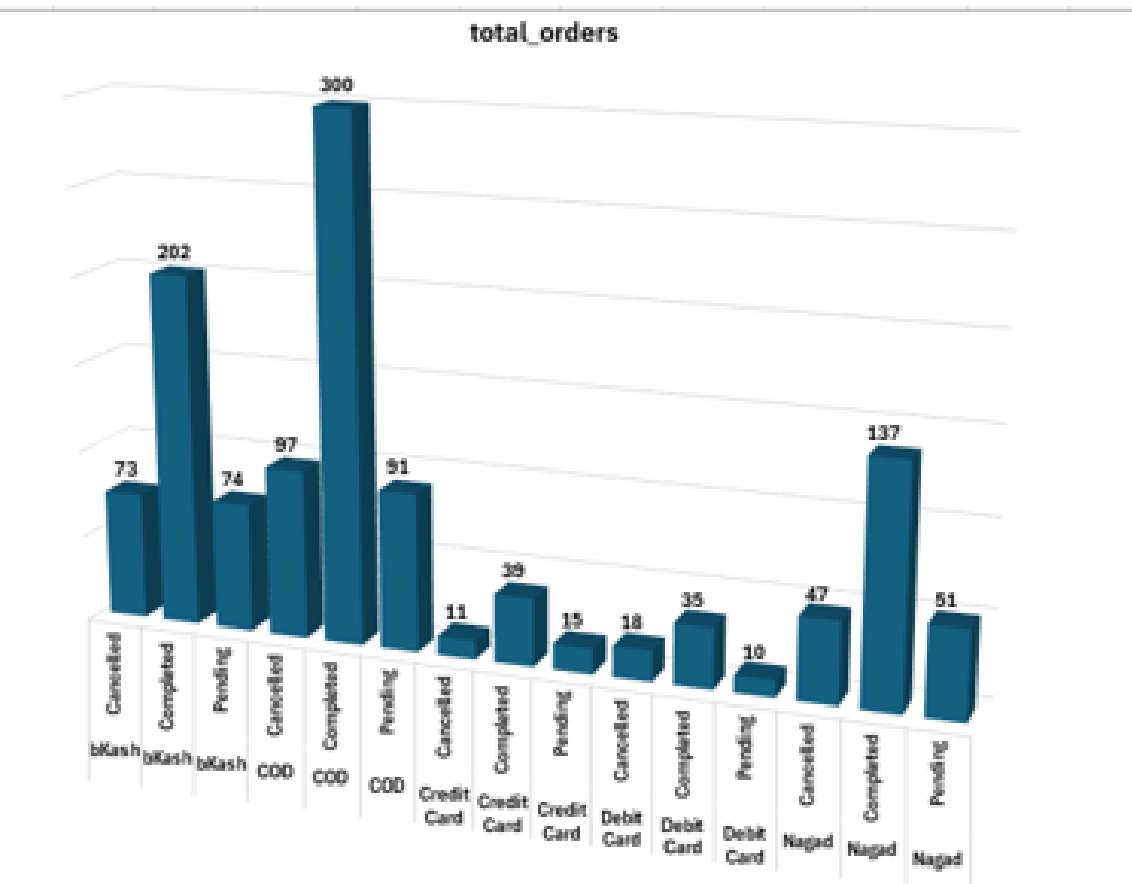

method	usage_count
COD	488
bKash	349
Nagad	235
Credit Card	65
Debit Card	63

- The analysis shows which payment methods are most popular among customers. Focusing on the preferred methods can improve the checkout experience and potentially increase completed orders.

17. Is there any relationship between payment method and order status?

payment_method	order_status	total_orders
bKash	Cancelled	73
bKash	Completed	202
bKash	Pending	74
COD	Cancelled	97
COD	Completed	300
COD	Pending	91
Credit Card	Cancelled	11
Credit Card	Completed	39
Credit Card	Pending	15
Debit Card	Cancelled	18
Debit Card	Completed	35
Debit Card	Pending	10
Nagad	Cancelled	47
Nagad	Completed	137
Nagad	Pending	51

- ❑ COD orders have higher cancellation and return rates, while Credit Card and Digital Wallet orders have higher completion rates. Businesses can reduce risk by applying targeted verification or reminders for high-risk payment methods.

18. certain cities prefer specific payment methods?

city	payment_method	total_orders
Barishal	COD	76
Barishal	bKash	44
Barishal	Nagad	28
Barishal	Debit Card	15
Barishal	Credit Card	10

Sylhet	Credit Card	8
Sylhet	Debit Card	7

- ❑ Large cities mainly use Credit Card and Digital Wallet payments, while small towns prefer Cash on Delivery (COD). Marketing should be city-focused: promote digital payments with offers in big cities and build trust and convenience in high-COD areas.

19. Are higher-value orders associated with specific payment methods?

payment_method	high_value_orders	avg_high_value_order
COD	209	1106.4928229665072
bKash	148	1165.7635135135135
Nagad	109	1090.8990825688074
Credit Card	27	1139.962962962963
Debit Card	22	1113.4545454545455

- ❑ High-value orders are concentrated in specific payment methods, indicating these methods are preferred for larger purchases.

20. What is the average number of items per order by payment method?

- ❑ Customers using certain payment methods tend to purchase more items per order, indicating a link between payment choice and order size.

21. Which products are most frequently ordered together?

product_1_id	product_1_name	product_2_id	product_2_name	times_ordered_together
24	Potato 1kg	30	Peanut 500g	22
8	Farm Fresh Milk 1L	24	Potato 1kg	21
23	Onion 1kg	34	Shoes Polish	18
1	Miniket Rice 5kg	40	Power Bank 10000mAh	18
4	Fresh Sugar 1kg	33	Sprite 1L	18
27	Flour (Atta) 2kg	37	Cap	18
7	Deshi Egg (12 pcs)	22	GP Internet Pack	17
9	Bru Coffee 200g	40	Power Bank 10000mAh	17
28	Biscuits (Mixed)	33	Sprite 1L	17
5	ACI Pure Salt 1kg	8	Farm Fresh Milk 1L	17

- Certain products are frequently ordered together, highlighting opportunities for bundles and cross-selling.

22. Which product pairs appear most often across all orders?

product_1_id	product_1_name	product_2_id	product_2_name	times_ordered_together
24	Potato 1kg	30	Peanut 500g	22
8	Farm Fresh Milk 1L	24	Potato 1kg	21
23	Onion 1kg	34	Shoes Polish	18
1	Miniket Rice 5kg	40	Power Bank 10000mAh	18
4	Fresh Sugar 1kg	33	Sprite 1L	18
27	Flour (Atta) 2kg	37	Cap	18
7	Deshi Egg (12 pcs)	22	GP Internet Pack	17
9	Bru Coffee 200g	40	Power Bank 10000mAh	17
28	Biscuits (Mixed)	33	Sprite 1L	17
5	ACI Pure Salt 1kg	8	Farm Fresh Milk 1L	17

- Certain product pairs are frequently ordered together, highlighting opportunities for bundles and cross-selling.

23. Are there product pairs that consistently drive higher order values?

product_1_id	product_1_name	product_2_id	product_2_name	times_ordered_together	avg_order_value
39	Ladies Bag	40	Power Bank 10000mAh	4	1972
2	Nazirshail Rice 5kg	40	Power Bank 10000mAh	9	1934.78
36	T-shirt (Women)	40	Power Bank 10000mAh	10	1792.3
6	Broiler Chicken (whole)	40	Power Bank 10000mAh	12	1706.83
38	Wallet (Men)	40	Power Bank 10000mAh	10	1700.4
35	T-shirt (Men)	40	Power Bank 10000mAh	7	1667
1	Miniket Rice 5kg	40	Power Bank 10000mAh	18	1656.22
34	Shoes Polish	40	Power Bank 10000mAh	10	1618.5
1	Miniket Rice 5kg	39	Ladies Bag	7	1601.71
2	Nazirshail Rice 5kg	39	Ladies Bag	10	1592.2

- ❑ Certain product pairs consistently generate higher order values, highlighting opportunities for premium bundles and targeted promotions.

24. Which product combinations could be recommended as bundles to increase revenue?

product_1_id	product_1_name	product_2_id	product_2_name	times_ordered_together	avg_order_value
2	Nazirshail Rice 5kg	40	Power Bank 10000mAh	9	1934.78
36	T-shirt (Women)	40	Power Bank 10000mAh	10	1792.3
6	Broiler Chicken (whole)	40	Power Bank 10000mAh	12	1706.83
38	Wallet (Men)	40	Power Bank 10000mAh	10	1700.4
35	T-shirt (Men)	40	Power Bank 10000mAh	7	1667
1	Miniket Rice 5kg	40	Power Bank 10000mAh	18	1656.22
34	Shoes Polish	40	Power Bank 10000mAh	10	1618.5
1	Miniket Rice 5kg	39	Ladies Bag	7	1601.71
2	Nazirshail Rice 5kg	39	Ladies Bag	10	1592.2
11	Horlicks 500g	40	Power Bank 10000mAh	6	1576

- ❑ Frequently ordered product pairs with high average order values can be recommended as bundles to boost revenue.

25. Based on product co-occurrence and customer behavior, which products should UrbanCart promote together to maximize cross-selling opportunities?

product_1_id	product_1_name	product_2_id	product_2_name	times_ordered_together	avg_order_value
24	Potato 1kg	30	Peanut 500g	22	491.86
8	Farm Fresh Milk 1L	24	Potato 1kg	21	408.33
1	Miniket Rice 5kg	40	Power Bank 10000mAh	18	1656.22
27	Flour (Atta) 2kg	37	Cap	18	666.78
23	Onion 1kg	34	Shoes Polish	18	655.44
4	Fresh Sugar 1kg	33	Sprite 1L	18	505.44
9	Bru Coffee 200g	40	Power Bank 10000mAh	17	1539.41
9	Bru Coffee 200g	12	Oral Saline (ORS)	17	824.18
7	Deshi Egg (12 pcs)	22	GP Internet Pack	17	819.94
28	Biscuits (Mixed)	33	Sprite 1L	17	494.44

- ☐ Frequently co-purchased product pairs with high order values should be promoted together to maximize cross-selling opportunities.
